

Brenda's Blocks Task

Brenda is doing an experiment in math class. She wants to find the weight of one plastic block and the weight of one wood block. Look at the scales below:

Three plastic blocks weigh the same as two wood blocks.

The total of one plastic block and one wood block is 15 ounces.

How many ounces does one plastic block weigh? How many ounces does one wood block weigh? Show how you found your answers.

Weight of one plastic block: _____ ounces.

Weight of one wood block: _____ ounces.
